## Jonathan Canutti

When one is born in the town of Vallauris - the land of ceramists, sculptors, and famous or unknown painters - ones senses are naturally awakened. After having been a visual leader for a large ready-to-wear brand, and discarding the idea of making his own creation, Jonathan Canuti decided to develop a creative and participative concept in fashion up-cycling called the Clandestin Studio. He and his team rework the wardrobe basics for man, woman and children, and every year offers a collection of sixty pieces to buy on their website or in shops. He also invites his customers to draw the silhouette that they like on the site and send their own clothes to be reworked in their clandestine lab where craft is always at the forefront. Creating scarcity, making small-scale pieces, promoting local know-how, and promoting one's work - a successful first show in Mamac - is a lot of investment but one also gets a lot of love in return. Good for him, it is his fuel.

## 02 Knitting battle #DIY

If you had been told that one day you would become a knitting fan like your Granny would you have believed it? It's the fault of Nice Whool, with its macrame, crocheting or knitting workshops - transforming the practice of killing boredom into happy and creative battles.

### CARPE DIEM

It all came to a standstill one July night - recklessness driven by blind ignorance. The riviera no longer had its tralala heart. It was necessary to rebuild oneself, to think of something else, to learn to go out again, to talk to each other, to listen to each other, to avoid the defences which are supposed to protect us. Now we know that the city will go on - like a fresh start rid of the futile, the flashy, and the lazy. Towards a radiant future; creative and collaborative. Many have already gotten involved, replacing bling with chic, disposable with recyclable, copy with original, déjà-vu with atypical. Creators and traders who want to create and share their passions for clothing, design, and gastronomy; living a day-to-day lifestyle as if it each day were the last. Living in one of the most beautiful cities without loving its vibes would be like a niçoise salad without anchovies - unthinkable! So "Issa Nissa"\* and outside everyone!

\* "Go Nice!"
